PROFILE

Software Engineer from the Pontifical Catholic University of Ecuador, with over two years of experience in full-stack development and cloud deployment. Experienced in the design and implementation of enterprise systems, process automation, and mobile application development.

Experienced with monolithic and microservices architectures, deployments on AWS and Azure, and technical leadership in mobile projects. I am characterized by my autonomy, adaptability, and focus on scalable and efficient solutions.

WORK EXPERIENCE

Socio & Technical Lead – Mobile Development

Lupio Pet - Remoto, Ago 2025 - Present

- Partner on a technology project focused on developing a mobile application.
- Technical leadership of the mobile development team.
